 $^{^1}$ Stockwell, T., Sitharan, T., McGrath, D.& Lang, . (1994). The measurement of alcohol dependence and impaired control in community samples. Addiction, 89, 167-174.

12. The day after drinking alcohol, I had a very strong craving for a drink when I awoke. ALMOST NEVER **SOMETIMES OFTEN ALMOST ALWAYS** 13. I drank more than a quarter of a bottle of spirits in a day (OR 1 bottle of wine OR 7 ALMOST NEVER **SOMETIMES OFTEN ALMOST ALWAYS** 14. I drank more than half a bottle of spirits per day (OR 2 bottles of wine OR 15 beers). ALMOST NEVER **SOMETIMES OFTEN** ALMOST ALWAYS 15. I drank more than one bottle of spirits per day (OR 4 bottles of wine OR 30 beers). **SOMETIMES** ALMOST ALWAYS ALMOST NEVER **OFTEN** 16. I drank more than two bottles of spirits per day (OR 8 bottles of wine OR 60 beers)

OFTEN

ALMOST ALWAYS

Imagine the following situation:

ALMOST NEVER

1. You have been completely off drink for a few weeks

SOMETIMES

2. You then drink very heavily for two days

How would you feel the **morning after** those two days of drinking?

17. I would start to sweat. NOT AT ALL **SLIGHTLY MODERATELY QUITE A LOT** 18. My hands would shake. NOT AT ALL **SLIGHTLY MODERATELY QUITE A LOT** 19. My body would shake. NOT AT ALL **SLIGHTLY MODERATELY QUITE A LOT** 20. I would be craving for a drink. NOT AT ALL **QUITE A LOT** SLIGHTLY **MODERATELY**

SCORE

CHECKED BY:

ALCOHOL DETOX PRESCRIBED: YES/NO

NOTES ON THE USE OF THE SADQ

The Severity of Alcohol Dependence Questionnaire was developed by the Addiction Research Unit at the Maudsley Hospital. It is a measure of the severity of dependence. The AUDIT questionnaire, by contrast, is used to assess whether or not there is a problem with dependence.

The SADQ questions cover the following aspects of dependency syndrome:

- physical withdrawal symptoms
- affective withdrawal symptoms
- relief drinking
- frequency of alcohol consumption
- speed of onset of withdrawal symptoms.

Scoring

Answers to each question are rated on a four-point scale:

Almost never - 0 Sometimes 1 Often 2 Nearly always 3

A score of 31 or higher indicates "severe alcohol dependence".

A score of 16 -30 indicates "moderate dependence"

A score of below 16 usually indicates only a mild physical dependency.

A chlordiazepoxide detoxification regime is usually indicated for someone who scores 16 or over.

It is essential to take account of the amount of alcohol that the patient reports drinking prior to admission as well as the result of the SADQ.

There is no correlation between the SADQ and such parameters as the MCV or GGT.
